U.S. Environmental Protection Agency, Region 5
ATTN: Mr. Wayde Hartwick, HSRL-6J
77 W. Jackson Blvd., P-19j
Chicago, IL 60604-3590

Dear Mr. Hartwick:

I greatly appreciate the opportunity to submit this unique technology developed by Benny Peacock to the U.S. EPA for the American Chemicals Services Project in Griffith, Indiana. This technology, I believe, is a viable and cost effective alternative compared to incineration for the PCB contaminated soils.

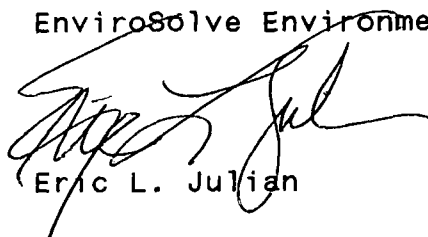

As we discussed on the phone, I have enclosed a packet of information from a Mr. Benny Peacock, who has the patent rights on the technology. This should help answer any questions on how the technology works. Mr. Peacock's technology is well documented and has been demonstrated in EPA Site Programs. The disposal of the PCB contaminated material is accomplished within RCRA & TSCA Guidelines and offers a better means of disposal than incineration.

I am aware that many different technologies have been proposed for the disposal of the contaminated material. After you review Mr. Peacock's technology, I am confident that you will want to pursue this technology further. If you think I might need to send this information to any one else who is working on this project please let me know and I will get them the information.

I hope we can be of assistance to you in the future. If you have any questions after reviewing Mr. Peacock's program, please feel free to contact Troy Flowers, V.P. EnviroSolve, or myself at 800 886-7956.

Best Regards,

EnviroSolve Environmental Management, Inc.

Eric L. Julian

WHAT IS ENVIROSOLVE?

EnviroSolve is an Indianapolis-based environmental management company providing transportation and disposal services for a wide range of regulated hazardous waste materials. We offer an affordable program developed specifically for the small quantity generator—those companies generating less than truckload quantities of hazardous waste each month.

Successful hazardous waste management goes well beyond transportation and disposal. It requires careful evaluation of your waste materials, proper planning and documentation, and overall service reliability to assure that your waste streams are managed in the safest, environmentally responsible manner possible. EnviroSolve is a committed partner in helping your company achieve this goal.

HOW ENVIROSOLVE WORKS

Our full service program provides the best possible solutions to effectively managing your hazardous wastes. EnviroSolve works closely with you each step of the way to assure that your hazardous waste management program is efficient, cost effective, and most important, compliant with all state and federal environmental regulations.

EnviroSolve services include:

- Waste stream evaluation and segregation
- Sampling and analysis
- Material handling & temporary storage procedures
- Scheduled and on-call transportation & disposal services
- Manifesting & regulatory documentation
- Employee safety and current regulatory information

ENVIRONMENTAL RESPONSIBILITY

Our highest priority is environmental responsibility. We are committed to maintaining uncompromising compliance to assure employee and community safety; to minimize potential environmental liabilities due to accidents; and to encourage and promote a cleaner, safer environment throughout all phases of our operation.

INSURANCE COVERAGE

EnviroSolve carries comprehensive general and automotive liability insurance, as well as pollution liability insurance in amounts and scope required by current state and federal environmental regulations. All fleet vehicles are owned and operated by EnviroSolve. EnviroSolve does not broker or subcontract any transportation services.

HAZARDOUS WASTE PROFESSIONALS

Our trained personnel have extensive experience in all areas of hazardous waste management. All EnviroSolve drivers receive comprehensive classroom and field training on a continual basis in areas of defensive driving, DOT, OSHA, and RCRA regulations, and spill/emergency response procedures.

OUR DISPOSAL POLICY

EnviroSolve utilizes only those treatment, storage, and disposal (TSD) facilities which meet our rigorous standards. EnviroSolve designated TSD facilities meet all state and federal environmental regulations and are properly permitted by the Environmental Protection Agency.

REGULATED HAZARDOUS WASTES

EnviroSolve offers full services for a wide range of regulated hazardous waste streams including:

- Commercial chemical products
- Flammable and combustible solvents
- Dry cleaning solvents and residues
- Photographic processing wastes
- Paint wastes and thinners
- Printing wastes
- Contaminated waste oils
- Lab Packs
- Pesticides
- Corrosives
- Caustics
